

# SATELLITE EUTELSAT 117 WEST A

## PREMIUM NEIGHBORHOOD FOR THE AMERICAS

Ku-band 1 North American Downlink Coverage

C-band Pan-American Downlink Coverage

### C and Ku-band hemi coverage for North and South America

The 117° West location is the premium TV neighborhood for Latin America, offering pan-regional distribution of major networks and content providers. With an extremely strong cable head-end penetration, top pay-TV operators in Latin America receive their content from 117° West.

Around 500 TV channels, 150 in HD, are currently distributed to over 100 million TV homes across the continent. 117° West is also a growing free-to-air TV neighborhood with 140 TV channels broadcasting in the clear, including channels from key regional public and private broadcasters.

With spectrum availability in the higher 200 MHz of C-band, bandwidth is not affected by the FCC 5G Auction.

In addition, EUTELSAT 117 West A provides exceptional levels of throughput in North America and the Andean region. This satellite offers excellent performance for social connectivity projects, cellular backhaul and VSAT networks, among others.

EUTELSAT 117 West A is commercialised by Eutelsat Americas.
