EUTELSAT 113 WEST A

CONNECTING LATIN AMERICA, CONTINENTAL UNITED STATES & HAWAII

At 113° West, EUTELSAT 113 West A provides the best power and coverage in both C- and Ku-bands throughout the Americas on its hemi beams, along with its regional beams.

The EUTELSAT 113 West A satellite currently distributes over 130 channels, received by 1,300 antennas in the region. It fully covers cable head-ends in Mexico as well as ethnic cable head-ends in the United States, with over 7,000 DTH antennas receiving channels in Ku-band.

EUTELSAT 113 West A also offers a powerful spot beam over the main cities in South America.
