

VIDEO CONTRIBUTION OVER ONEWEB LEO WORLD SPORT EVENTS

PLAY ON! RELIABLE, PORTABLE, ENTERPRISE-GRADE LIVE COVERAGE

Covering the most-watched sports events in the world demands more than just speed – it requires resilience, precision, and absolute reliability. Eutelsat, in collaboration with USSI Global, is introducing a dedicated Occasional Use (OU) Video over OneWeb LEO solution, tailored for non-rights-holding broadcasters who need to deliver live coverage under tight timelines and challenging connectivity conditions.

The turnkey bundled solution combines:

- Low latency OneWeb LEO connectivity
- Portable, easy-to-deploy user terminals
- Ready-to-use with any cellular bonding solution

Ensuring seamless, uninterrupted live contribution from stadiums, fan zones, and even the most remote locations, broadcasters can stay agile, on-air, and on time, wherever the story unfolds.

COMBINING ONEWEB LEO WITH CELLULAR BONDING

ONEWEB LEO

- **Stable Throughput:**
Sub-100ms latency with stable bandwidth up to 150/30 Mbps.
- **Global Reach:**
Line-of-sight coverage anywhere, even in remote or congested areas.
- **Quick Deployment:**
Portable terminals enable fast Communication on the Pause (COTP) set-up compatible with any cellular bonding solution.

CELLULAR BONDING

- **Portable & Accessible:**
Easy set-up and configure live transmission, thanks to mobile encoder.
- **Resiliency:**
Increased link performance and robustness, thanks to cellular network bonding.
- **Cost-Efficient:**
Affordable and flexible SIM-based data plans.

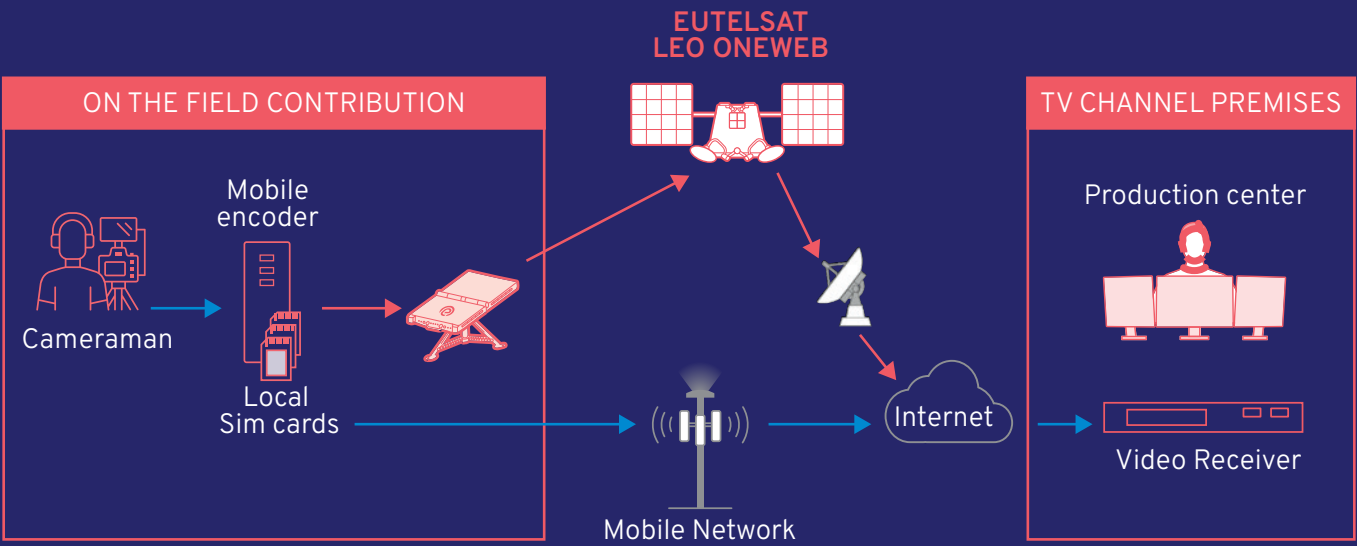

KEY BENEFITS

WHY CHOOSE ONEWEB LEO FOR YOUR SPORTS COVERAGE?

- Broadcast-Grade Performance
 - Low latency
 - Stable throughput
- True Mobility & Rapid
 - Deployment
 - Coverage reliability in congested environments
- Hybrid Resilience
 - Redundancy
 - Throughput optimization
 - Continuous contribution thanks to OneWeb LEO and cellular bonding
- Turnkey Occasional Use Bundles
 - Designed for short-term global events
- Trusted Delivery Partner:
 - USSI Global

HOW DOES IT WORK?

HYBRID CONTRIBUTION WITH EUTELSAT ONEWEB LEO AND CELLULAR BONDING

THE SOLUTION

Our comprehensive Service Plans are designed to balance peak throughput, guaranteed performance (CIR), and volume consumption depending on the nature of the live contribution.

OPTIMISED FOR HIGH-RELIABILITY LIVE SPORT	
MIR: 100 / 20 Mbps	
Volume Allowance: Unlimited data usage	
Service Level: CIR Included	

INCLUDED IN ALL BUNDLES

- 2 months of OneWeb LEO service
- Rental of OneWeb User Terminal (INSTER antenna, subject to availability)
- Option to purchase terminal at a discounted price post-event
- Compatible with any customer-provided encoder & bonding backpack
- Support and logistics coordination via USSI Global

AN AGILE, TRUSTED PARTNERSHIP

Eutelsat’s OneWeb LEO service empowers broadcasters to deliver high-quality, low-latency video contribution from virtually anywhere. Together with USSI Global, a long-standing Eutelsat partner, their extensive experience supporting major international sports events under high-pressure live conditions makes it the winning combination for resilient, reliable content delivery.

READY TO KICK-OFF?

Secure your Occasional Use OneWeb LEO bundle today and ensure your teams are connected, wherever the story unfolds.
